THIS MONTH'S TOPIC:

PREVENT POISONINGS IN YOUR HOME

National Poison Prevention Week raises awareness of poison prevention during the third full week of March every year. Poisoning occurs when someone ingests a substance that can cause sickness or death. That can mean they swallow it, breathe it, touch it, or splash it in their eye. Sometimes, it is the substance itself that is dangerous because it is not meant for the body. But often, poisoning happens when a person ingests too much of a substance, or misuses a substance, mixes it with other substances, or it is contaminated in some way before ingestion.

The American Cleaning Institute reports that 90% of all poisonings occur in the home. Even though it is the one environment you think people

would have the most control over and would therefore be the safest. This statistic highlights the need for adults to make good choices in their homes. They need to pay attention when it comes to household products that can be a danger to themselves and their family members.

Read the label

Poison prevention at home starts with reading product labels. Turn on the lights, get your glasses, and read product labels, even if you use the item often. This includes medications, cleaners, repair products such as glue, or project supplies like paint and stain.

Pay close attention to products whose labels include words like "Caution," "Warning," "Danger," or "Poison." If you have any questions about how to use or store the item, call the toll-free number found on most product labels.

Share safety with others

There are some simple tips you can share with your friends and family to help keep poisoning accidents from happening:

- Always read and follow product label directions for proper use, storage, and disposal.
- Store cleaning products in a closed area that is away from food and not accessible to young children or pets.
- Store products in their original containers and keep the original label intact. Product use and storage, disposal instructions, precautions, and first aid instructions vary according to their ingredients.
- Do not mix cleaning solutions or other chemicals.
- Keep medications in a secured area out of the reach of children. Supervise children when they are taking a medication, even vitamins or supplements.
- Consult your pharmacist about taking multiple medications at once and taking any over-the-counter medications along with prescription medications. Never take a medication prescribed to someone else.

Never take a medication prescribed to someone else.

Call for help

Keep the number to Poison Help Line (below) posted in an easy-to-find place in your home and in your phone.

If you think someone may have ingested or otherwise been exposed to a harmful product, call the Poison Help Line at 1-800-222-1222.

This national number will connect you with your local Poison Control Center.

If the person is in distress, call 911 immediately.
