### Double Puzzle

Unscramble each word.  
Then use the marked  
letters to solve the  
second puzzle!

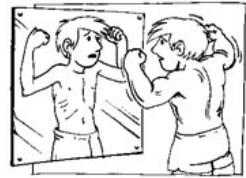

Good Luck!

*(Answers on Back!)*

How many times have you heard someone say or even told yourself: "I'm fat", "I'm too skinny", "My thighs stick out", "My legs are too short", "Disgusting, a pimple", "How embarrassing, I'm hairy"....? This is how many people see themselves when they look in the mirror and think about their body.

**Body image** is simply that. It is the mental picture we have of ourselves, **the way we think we look**. Body image is your own opinion and how you feel about your size, shape, weight, and other parts of your body. It is sometimes hard to accept how we "really" look because of the many things around us that tell us how we "should" look.

Body image affects both young men and young women! *Young men* face pressure to tone-up, build muscle, and look big, strong and tanned. *Young women* face pressure to slim-down, tone-up, and look petite and thin.

### Get Moving Kentucky!

#### Monthly Health Tip

for YOUTH!

Regular physical activity can reduce your risk of chronic disease. Have a physically active day by taking the stairs when they are available, and biking or walking to the store or your school with your parents or friends.

## What body size and shape is for you?

You will be the right size and shape for you, if you do three simple things....

### \***Eat healthy foods -**

choose a variety from all of the food groups!

**\*Young people should exercise for 60 minutes most days of the week -**  
kick-boxing, aerobics, walking the dog.....

**\*Have the occasional indulgence - such as chocolate cake.....Yummy!**

If you follow these simple suggestions, you will be the **right size and shape for you!**

Remember, our body shape is already decided before we are born. This is fact! Each one of us is a unique human being with our own genes from our mom and dad, their mom and dad and their mom and dad and so on..... There is only one person in the world shaped like the famous film stars we see on television and on the big screen and that is the film stars themselves. And there is only one person in the world with legs like you.....You guessed it. **You!**

## Society's Effect on our Self-Esteem

We live in a culture with a multi-million dollar fashion and cosmetic industry that makes lots and lots of money by telling people they need to improve the way they look. We're surrounded with messages in:

advertisements

magazines

bill-boards

movies

fashion shows

make-up parties

beauty salons

They all use different ways to tell us we desperately need their product!

The more terrible we think we look, the better the chance they have of selling us their product.

**Notice the ads in magazines.** The model appears flawless. His or her teeth are straight and white. Their hair is well groomed with a "fashionable" hair cut. Their skin is smooth and flawless. Some magazines may even add brushing or contouring to hide the imperfections that they don't want the consumer to see. Now notice the product being advertised. The text may refer to leading scientific studies that indicate your "need" for this product. These are just some of the ways companies sell their product and show "the perfect body" or "look" you will achieve if you use it.

**So what happens when we still look like our super selves?** When we don't look like the models in the magazines or movie stars, we often think there must be something wrong with who we are. When the product doesn't work, we blame ourselves and think we are failures. Next time you see an advertisement on TV or in a magazine, ask yourself the following questions:

*Who really looks like this? If you buy this product, are you really going to look or have fun like the people in the advertisement? What kind of language is used? Is there a lot of hip-hop jargon trying to make me feel cool and hip? What promises are being made by the ad? Are they really possible?*
