BUILDING STRONG FAMILIES FOR KENTUCKY

OUR FOCUS

► Family and Consumer Sciences Extension is committed to improving the quality of life for individuals and families in Lee County resulting in strong families for Kentucky. Educational programs focus on:

Making Beneficial Lifestyle Choices
Nurturing Families
Embracing Life as You Age
Securing Financial Stability
Promoting Healthy Homes and Communities
Accessing Nutritious Food
Empowering Community Leaders

Family and Consumer Sciences Extension made **12,513** contacts with Lee County families during 2008-2009.¹

OUR PEOPLE

Figure 1. Population by Age Group² (n=7,916)

► 2008 estimates from the 2000 U.S. Census reported total population as **7,916**.² The graph on the right indicates the percentage by age group.

SPOTLIGHT ON...

MAKING BENEFICIAL LIFESTYLE CHOICES

Less than 85 % of adults living in Lee and Owsley counties eat five or more servings of fruits and vegetables per day and more than 40 % report no leisure-time physical activity. These counties are among Kentucky's highest incidence of adult obesity. The child poverty rate averages 43.7 %. Considering this, the FCS programs in these counties developed a SNAP-Ed project targeting kindergarten through third-grade students and their families to increase fruit and vegetable consumption and physical activity. Nutrition Education Program (NEP) assistants are also employed in both counties. NEP evaluation data shows participants completing the program averaged a daily increase of almost five servings of fruits and vegetables. Seventy-six percent of the participants more often thought about healthy food choices when deciding what to feed their family.¹

OUR COMMUNITY

► Unemployment rates are a key economic indicator. In August 2009, the rate of unemployment in Lee County was **12.5%**.³

Mortgage and bank card delinquency rates and foreclosure filings are important financial indicators of community well-being. In Lee County, **0.99%** of mortgages are 90-days delinquent and 60-day bank card delinquency rates have increased by **3.16%**.⁴ In a one-year period (October 2008 through October 2009), **7** foreclosures were filed.⁵

Access to health insurance is another important factor contributing to family well-being. In Lee County, **21%** of the people under age 65 are uninsured.⁶

As a result of participation in Lee County Extension programs:¹

- **120** people were involved in addressing issues of their community.
- **79** people increased their knowledge of governmental process.
- **82** people were prepared to enter the work force.

OUR HEALTH

► The health of our people contributes to quality of life. The chart below illustrates health risks of adults in Lee County.
*Figure 2. Health Risks.*⁶

As a result of participation in Lee County Extension programs:¹

- **490** people increased knowledge of practices to maintain health and well-being.
- **381** people increase knowledge of safe practices to store, handle, and prepare food.
- **307** people developed skills to access affordable food.

OUR FAMILIES

► Using data from the 2000 U.S. Census, Lee County families can be described as follows:²

- **2,122** families reside in the county.
- **540** families (**25.2%**) live below poverty level.
- Median family income is **\$24,918**.
- **96** grandparents are responsible for the care of their grandchildren.

According to the Kentucky Cabinet for Health and Family Services, **1,325** people in Lee County receive food stamps. The average family food stamp benefit is **\$181.88** per month.⁷

In the county, **44** children live in out-of-home care.⁸

In 2005, there were **13** incidents of adult abuse and **38** incidents of child abuse.⁹

As a result of participation in Lee County Extension programs:¹

- **431** adults and youth improved their ability to make informed and effective decisions.
- **398** people adopted money management practices to reduce debt and/or increase savings.
- **171** people increased their knowledge and skills related to parenting and personal relationships.
