SPOTLIGHT ON...

MAKING BENEFICIAL LIFESTYLE CHOICES

The health of America's children is at risk because of poor nutrition and physical inactivity. Fewer than 15% of schoolchildren eat the recommended servings of fruit; fewer than 20% eat the recommended servings of vegetables. According to the Kentucky Institute of Medicine, Trimble County lacks appropriate levels of physical activity, which could result in diabetes and obesity. Cooperative Extension Service partnered with Trimble County School System to offer Literacy, Eating, and Activity for Preschoolers (LEAP) curriculum to approximately 70 preschoolers. This program uses books that focus on preparing and eating healthy foods and being physically active. Teachers reported that as a result of the program the children were choosing to eat more fruits and vegetables at mealtime.¹

OUR COMMUNITY

► Unemployment rates are a key economic indicator. In July 2010, the rate of unemployment in Trimble County was **12.1%**.⁶
