SPOTLIGHT ON ...

MAKING HEALTHY LIFESTYLE CHOICES

Kentucky's high number of adults diagnosed with diabetes reinforces the need for research-based programs and outreach. Using newly developed curriculum, Family and Consumer Sciences Agent taught Floyd County diabetics food preparation and management skills in taking ownership of their Type II diabetes. One participant stated, "It's easy to forget (at my stage of the disease) that I need to watch my food intake and types of food, because I don't want to have the complications that come with diabetes later in life. The ongoing series gives me incentive to stay on track." Another participant stated, "I have lowered my blood sugar levels." Participants took an active role in the recruitment of program participants, program promotion, and support groups planning.
