### Back to Basics Cooking School

Sometimes young parents feed their children fast food and processed meals simply because they lack the skills to prepare meals at home. According to MyPlate, cooking at home enables better choices about what and how much is eaten. To encourage meals at home and address Carter County’s 30 percent obesity rate, the FCS Extension staff conducted a “Back to the Basics Cooking School.” Ten families participated in the four-day series of lessons. Behavioral changes were determined through observation and a formal followup evaluation. One hundred percent of participants can now properly cut up a chicken, chop vegetables, and stock their kitchen. Since completion of the program, all participants reported preparing one or more nutritious recipes received through the program, feeling more confident preparing healthy meals and saving money on food.
