DIABETES SELF-MANAGEMENT

Diabetes is a growing problem in Kentucky. The Franklin County Cooperative Extension Service is actively encouraging diabetes management by providing the 10-week "Taking Ownership of Your Diabetes" curriculum. Participants reported ongoing challenges with food selection and diabetes management. Most indicated they try to manage the disease, but that taking a different class helped refresh what they needed to do to gain control. Some were not checking blood sugars regularly and had not seen a podiatrist or nutritionist. Local physicians addressed the importance of routine foot care, eye care, and heart disease. One participant wrote that the classes were informative, the group interaction was invaluable, and that she has better managed the disease as a result.
In Franklin County…

- **3,289** was the average monthly number of children who received SNAP** (food stamps) in 2011, up from **2,239** children in 2007 (up 46.9%).
