Family and Consumer Sciences Extension is committed to improving the health and well-being of individuals and families in Lewis County. To help families make wise decisions, our educational programs focus on:

- **Making Healthy Lifestyle Choices** that influence health and well-being
- **Nurturing Families** as they cope with fewer resources and more demands
- **Embracing Life as We Age** to strive for independence longer
- **Securing Financial Stability** in a turbulent economic period
- **Promoting Healthy Homes and Communities** to recycle, reduce waste, and protect our environment
- **Accessing Nutritious Food** that is affordable, available and safe
- **Empowering Community Leaders** as we all work to sustain and improve our communities

In 2012-2013, Family and Consumer Sciences Extension made 13,176 contacts with Lewis County individuals and families.

**FOOD SECURITY**

As more families are three and four generations removed from the farm, it becomes increasingly important that children understand how food is raised. The Lewis County Extension Staff collaborated with the Boys and Girls Clubs to teach children to garden and prepare home-grown produce. Agents and leaders constructed and prepared raised beds for seeds and plants, and taught children how to water the gardens. Participants gained hands-on experience planting and maintaining the growing produce. Because research shows that children are more likely to eat food they have themselves prepared, children were taught how to chop produce, use a recipe, and make their own salsa. Ninety-six percent of the children ate the salsa, and many asked for more.
