## SPOTLIGHT ON ...

### DON'T BE SCARED, BE PREPARED

The Boyle County Family and Consumer Sciences agent collaborated with Fort Harrod FCS agents to host a multi-county seminar on disaster preparedness. The seminar focused on understanding various emergencies and natural disasters that could impact the community, knowing the contents of an emergency kit and how to acquire them, understanding safe and proper responses to an emergency, and developing a family plan in case of an emergency. Program evaluations showed that 88% of participants became more knowledgeable about what to do in an emergency, learned how to pack an emergency kit, and had prepared a plan for their family.

**H**ousing has long been recognized as a basic human need. Yet, because housing is often a family's largest expense and largest debt, it can be a stumbling block for many. Safe, lower-cost housing options are often limited for struggling families, and this can lead them into crisis. Family and Consumer Sciences Extension helps people improve home safety, lessen their environmental footprint, and strengthen financial stability. It also helps communities promote healthy lifestyles throughout the lifespan by supporting strong family home environments. Please tell us ways you think we can do more.
