## SPOTLIGHT ON ...

### BIGGEST LOSER CHALLENGE

Obesity threatens quality of life for Kentuckians by increasing the risk for many chronic health problems. Some 30% of Kentuckians report no leisure-time physical activity. The FCS agent organized a 10-week Biggest Loser Challenge to help fight the obesity problem. The "Weight: The Reality Series" and the USDA dietary guidelines were used as educational materials. Group support, recipe demonstrations, and weekly weigh-ins helped drive changes and weight loss. Participants earned points by attending twice weekly sessions. Of the 33 people who signed up, 18 completed the challenge. A poll showed that 7% of participants were first time users of Extension; 100% indicated they were making healthier food choices; 97% were exercising more; and 100% were driven to continue with positive behaviors. Challengers lost a total of 108 pounds.

**H**ousing has long been recognized as a basic human need. Yet, because housing is often a family's largest expense and largest debt, it can be a stumbling block for many. Safe, lower-cost housing options are often limited for struggling families, and this can lead them into crisis. Family and Consumer Sciences Extension helps people improve home safety, lessen their environmental footprint, and strengthen financial stability. It also helps communities promote healthy lifestyles throughout the lifespan by supporting strong family home environments. Please tell us ways you think we can do more.
