### SPOTLIGHT ON ...

## FOOD PRESERVATION

Lee County is ranked among the top three most impoverished counties in Kentucky. The Lee County Cooperative Extension Service strives to reach the families most in need and provide programs that will educate county residents on ways to extend their resources. As part of that initiative, Extension offers food preservation programs throughout the year, teaching ways to preserve garden produce, create healthy meals, and keep summer fruits and vegetables available into the winter months. In 2013 the programs reached more than 44 families, with more than 95% of participants reporting that they had successfully canned fresh foods from their gardens as a result of their participation in the program.

**H**ousing has long been recognized as a basic human need. Yet, because housing is often a family's largest expense and largest debt, it can be a stumbling block for many. Safe, lower-cost housing options are often limited for struggling families, and this can lead them into crisis. Family and Consumer Sciences Extension helps people improve home safety, lessen their environmental footprint, and strengthen financial stability. It also helps communities promote healthy lifestyles throughout the lifespan by supporting strong family home environments. Please tell us ways you think we can do more.
