## SPOTLIGHT ON ...

### LIVINGSTON COUNTY WELLNESS DAY

**T**he Nutrition Education Program assistant with UK Family and Consumer Sciences Extension taught 171 children at a local wellness day event to make healthy snack choices. The children learned that fruit and vegetables are nature's perfect snacks and that dairy foods should be eaten every day. The children made a yogurt parfait consisting of low-fat vanilla yogurt, fresh fruit, and granola. Each child chose strawberries, blueberries, or bananas as the fruit for their parfait. Involving the children in making their own snacks helps them feel that they have control over some of their food choices.

**H**ousing has long been recognized as a basic human need. Yet, because housing is often a family's largest expense and largest debt, it can be a stumbling block for many. Safe, lower-cost housing options are often limited for struggling families, and this can lead them into crisis. Family and Consumer Sciences Extension helps people improve home safety, lessen their environmental footprint, and strengthen financial stability. It also helps communities promote healthy lifestyles throughout the lifespan by supporting strong family home environments. Please tell us ways you think we can do more.
