### SPOTLIGHT ON ...

## GARDEN PARTY

In Madison County, consumers can choose from three farmers markets, five stores that carry locally grown foods, three community-supported agriculture programs and numerous local producers. In addition to better taste and nutritional value, using locally grown food supports the local economy, protects genetic diversity, and preserves green space. The Extension Homemakers encouraged use of locally grown foods and increased awareness of local sources through their cooking school, "Garden Party." An entire menu of recipes was demonstrated. Samples, a source guide and recipes were given to all 120 attendees. An evaluation showed that 65% of evaluation respondents had a better idea of where to buy local and 85% planned to use more locally grown foods.

**H**ousing has long been recognized as a basic human need. Yet, because housing is often a family's largest expense and largest debt, it can be a stumbling block for many. Safe, lower-cost housing options are often limited for struggling families, and this can lead them into crisis. Family and Consumer Sciences Extension helps people improve home safety, lessen their environmental footprint, and strengthen financial stability. It also helps communities promote healthy lifestyles throughout the lifespan by supporting strong family home environments. Please tell us ways you think we can do more.
