## SPOTLIGHT ON ...

### WHERE DOES YOUR MONEY GO?

**T**he Perry County Family and Consumer Sciences agent presented the University of Kentucky's "Where Does Your Money Go?" program to 37 Extension homemaker leaders in eight counties. They learned how money can be lost through spending leaks. All believed they managed their money well, but felt that they could close spending leaks to save more money. A survey done three months after the program showed that 70% of the participants were now saving money by watching spending leaks. Each participant saved an average of \$15 per week for a total savings of nearly \$6,700 in 12 weeks. Those 37 leaders also reduced their debt by \$3,200 in 12 weeks. They proved that a little awareness can result in big financial changes.

**H**ousing has long been recognized as a basic human need. Yet, because housing is often a family's largest expense and largest debt, it can be a stumbling block for many. Safe, lower-cost housing options are often limited for struggling families, and this can lead them into crisis. Family and Consumer Sciences Extension helps people improve home safety, lessen their environmental footprint, and strengthen financial stability. It also helps communities promote healthy lifestyles throughout the lifespan by supporting strong family home environments. Please tell us ways you think we can do more.
