BUILDING STRONG FAMILIES FOR KENTUCKY 2017

OUR FOCUS

Family and Consumer Sciences (FCS) Extension is committed to improving the health and well-being of individuals and families in Clark County. To help Kentuckians strengthen their financial, physical, and social well-being, our educational programs focus on:

- **Making Healthy Lifestyle Choices** that influence health and well-being
- **Nurturing Families** as they cope with fewer resources and more demands
- **Embracing Life as We Age** to live independently longer
- **Securing Financial Stability** in a turbulent economic period
- **Promoting Healthy Homes and Communities** that recycle, reduce waste, and protect our environment
- **Accessing Nutritious Food** that is affordable, available, and safe
- **Empowering Community Leaders** as we all work to sustain and improve our communities

In 2015-2016, Family and Consumer Sciences Extension made **13,626** contacts with Clark County individuals and families.¹

SPOTLIGHT ON...

HEALTH CARE

When compared to housing, food, and other basic needs, routine health care costs may be a relatively small portion of the family budget. However, when a family member has an accident or is diagnosed with a chronic disease, the cost of health care can quickly impact family budgets and family relationships. Family and Consumer Sciences (FCS) Extension agents help individuals, families, and communities adopt and promote healthy behaviors to reduce health risk factors that are associated with higher health care spending and negative health outcomes.

CHILDREN AND YOUTH

In 2015 there were an estimated **8,846** youth age 19 and under in Clark County.³ By 2020, it is projected that the county will have **9,147** youth.⁴

- The U.S. Census Bureau estimates that **369 (+/-85)** youth 18 or younger were without health insurance in 2014.⁵
- Between 2010 and 2014, **70%** of pregnant women received an adequate amount of prenatal care throughout their pregnancy.⁶
- From 2011 to 2013, **8.9%** of babies weighed less than 5.5 pounds at birth.⁷
- **51%** of newborns were being breastfed at the time of hospital discharge in 2011.⁷
- **14.1%** of children between the age of 2-4 were identified as obese through the WIC program (**2010**).⁷

As a result of participating in Clark County Extension programs:¹

- **50** people demonstrated that they used more practical living skills.
- **314** students report a better understanding of the risk and harm of substance abuse.

OLDER ADULTS

In 2015 there were an estimated **5,951** adults age 65 and over in Clark County.³ By 2020, this is projected to be **7,050** persons age 65 and over.⁴ Of these, **793** are projected to be age 85 and over.⁴

According to the 2010 Census, in Clark County:⁸

- **1,443** individuals 65 and over lived alone
- **156** individuals 65 and over lived in nursing homes

Of Medicare fee-for-service beneficiaries in Clark County:⁹

- **8.92%** have Alzheimer's disease, related disorders, or senile dementia
