Building Strong Families in Meade County

Our Focus
Family and Consumer Sciences (FCS) Extension is committed to improving the health and well-being of individuals and families throughout Kentucky. Our educational programs focus on making healthy lifestyle choices, nurturing families, embracing life as we age, securing financial stability, promoting healthy homes and communities, accessing nutritious food, and empowering community leaders.

Our Success
In 2017-2018, Family and Consumer Sciences Extension made 18,608 contacts with individuals and families in Meade County.¹

County Extension Agent, Family and Consumer Sciences Education

A Healthier Kentucky
Parenting skills for family success

By using effective parenting skills, parents help children become responsible, caring adults and productive members of society. However, limited resources can make it hard for parents to get formal parenting training. In Kentucky, Family and Consumer Sciences (FCS) Extension through the University of Kentucky provides parenting skills programs. As these programs strengthen families, they also empower our communities. Our goal is to provide educational opportunities to help every family succeed.

2017 estimated population under 18 years old²

- 453 to 2,326
- 2,330 to 5,512
- 3,556 to 5,422
- 5,668 to 10,320
- 10,347 to 171,882

¹ Of counties in Kentucky implemented programs to teach effective parenting skills.
² Of counties in Kentucky reported that parents and/or caregivers used community resources.
Families face many challenges, including poverty, readying children for their school careers, and supporting children who are being harassed or bullied. Some parents also are unable to raise their children and must turn to relatives for help. No matter the challenge, FCS helps families succeed.

It takes a village
A growing number of children are being raised by other relatives, especially grandparents. The American Community Survey (ACS) estimates that between 2012 and 2016 in Meade County, 425 (+/- 156) grandparents lived with and were responsible for their grandchildren, and 379 (+/-134) grandchildren were being raised by their grandparents. For 88 (+/- 59) of those grandchildren, there was no parent present. Of all children living in all households, 526 (+/- 199) were stepchildren, 168 (+/- 101) were adopted children, and 94 (+/- 62) children were living with other relatives.

The safety of our children
For families, child safety is a priority that can be jeopardized in many ways. In Meade County in 2017, 16% (12.4%–19.6%) of all families with school-aged children lived below poverty, and there were 172 child victims of substantiated abuse or neglect in 2016. In the schools, there were 53 reported incidences of harassment, which included bullying, in the 2016-2017 school year for all school districts in Meade County.

Kindergarten readiness
The first five years of life are vital in a child’s development and success in life. In 2017, Meade County had an estimated 1,458 children ages 5 and under. Of those children, 138 were enrolled as preschoolers.

In Meade County, 50% of students entered kindergarten ready to engage in and benefit from early learning experiences in the 2016-2017 school year.
