Building Strong Families
In Pike County

Our Focus
Family and Consumer Sciences (FCS) Extension is committed to improving the health and well-being of individuals and families throughout Kentucky. Our educational programs focus on making healthy lifestyle choices, nurturing families, embracing life as we age, securing financial stability, promoting healthy homes and communities, accessing nutritious food, and empowering community leaders.

Our Success
In 2017-2018, Family and Consumer Sciences Extension made 17,837 contacts with individuals and families in Pike County.

A Healthier Kentucky
Parenting skills for family success

By using effective parenting skills, parents help children become responsible, caring adults and productive members of society. However, limited resources can make it hard for parents to get formal parenting training. In Kentucky, Family and Consumer Sciences (FCS) Extension through the University of Kentucky provides parenting skills programs. As these programs strengthen families, they also empower our communities. Our goal is to provide educational opportunities to help every family succeed.

2017 estimated population under 18 years old:
- 453 to 2,326
- 2,330 to 3,512
- 3,556 to 5,422
- 5,668 to 10,320
- 10,347 to 171,882

County Extension Agent, Family and Consumer Sciences Education

Cooperative Extension Service | Agriculture and Natural Resources | Family and Consumer Sciences | 4-H Youth Development | Community and Economic Development
Families face many challenges, including poverty, readying children for their school careers, and supporting children who are being harassed or bullied. Some parents also are unable to raise their children and must turn to relatives for help. No matter the challenge, FCS helps families succeed.

It takes a village
A growing number of children are being raised by other relatives, especially grandparents. The American Community Survey (ACS) estimates that between 2012 and 2016 in Pike County, 1,173 (± 277) grandparents lived with and were responsible for their grandchildren, and 1,185 (± 264) grandchildren were being raised by their grandparents. For 675 (± 238) of those grandchildren, there was no parent present. Of all children living in all households, 534 (± 172) were stepchildren, 348 (± 122) were adopted children, and 362 (± 150) children were living with other relatives.

The safety of our children
For families, child safety is a priority that can be jeopardized in many ways. In Pike County in 2017, 33.8% (28.1% – 39.5%) of all families with school-aged children lived below poverty, and there were 287 child victims of substantiated abuse or neglect in 2016. In the schools, there were 73 reported incidences of harassment, which included bullying, in the 2016-2017 school year for all school districts in Pike County.

Kindergarten readiness
The first five years of life are vital in a child’s development and success in life. In 2017, Pike County had an estimated 3,183 children ages 5 and under. Of those children, 87 were enrolled as preschoolers.

In Pike County, 53.1% of students entered kindergarten ready to engage in and benefit from early learning experiences in the 2016-2017 school year.

In Kentucky, as a result of FCS Extension…
8,270 parents and/or caregivers reported improved personal strengths, communication and life skills that strengthen families.

5,690 individuals reported behaviors that fostered the optimal development of children and youth.

5,623 parents and/or caregivers reported practicing parental leadership skills.
