VALUING PEOPLE. VALUING MONEY.

VOLUME 14 • ISSUE 12

THIS MONTH'S TOPIC: BECOMING A SMART SAVER AT MEALTIME

As the cost of food continues to rise, you might find yourself surprised by the grocery bill. According to the U.S. Department of Agriculture, from 2018 to 2022, food price inflation (20.4%) was the second-highest category increase, rising faster than other expenditure categories like medical care and housing. If rising costs are surprising, look for ways to squeeze your food budget. Avoid unhealthy ways to cut costs, such as foregoing healthy choices or reducing the size and frequency of meals. Instead, use the following strategies to stretch your food budget and reinforce healthy eating habits.

THRIFTY FOOD HACKS

Use what you have. Tightening your grocery budget should start before you head to the store. Be intentional in using your existing food stock before buying new. Inventory your freezer, fridge, and pantry at least twice a month to keep track of the items nearing their expiration dates. Then, create meal plans centered around these ingredients.

Browse a cookbook. Planning your recipes is an excellent way to ensure an affordable and healthy diet that meets your nutritional goals. Find multiple recipes that use similar ingredients you can mix and match to save time in the grocery and kitchen.

Also, when selecting recipes, prepare enough to have leftovers. This can save time and help you cut costs by reducing food waste. Invent new recipes with past meals or ingredients.

Meatless Mondays. The USDA reports nine food categories whose prices rose more than 10% in 2022, which include eggs (32%), poultry (14.6%), and other meat (14.2%). Fresh vegetables and fruits were reported to have the lowest increase in prices. Plant-based proteins may offer more nutrients for your money over meats. Items such as beans, legumes, potatoes, and protein-rich vegetables like broccoli or kale, are often more affordable options. You can increase meal size, enhance nutritional values, and squeeze your budget with a meatless meal plan.

DO NOT LET FOOD INFLATION BE A REASON TO FOREGO HEALTHY EATING HABITS

THRIFTY SHOPPING HACKS

Make a list. A shopping list makes your shopping trip quicker, helping you avoid buying things on a whim. It also keeps your pantry well-supplied. Stick to the list, but allow some flexibility to take advantage of sales. Estimate needed food quantities and be careful when buying large quantities of perishable items you cannot use within a week. Shop for the freshest produce, noting that, usually, groceries stack new inventory toward the back of the shelves.

Clip coupons. Look for digital coupons that match the items on your list. Even coupons with small discounts can accumulate savings. Check in-store sales including customer loyalty savings and discounted produce carts or other deals. These might contain fruits and vegetables that are slightly older but still delicious if you eat them within a day or two. Also, selecting frozen and canned foods may be less costly and last longer.

Buy in bulk. Bulk purchases may lead to larger savings in your food budget if your household will eat through an item in larger quantities. However, buying bulk treats (such as soda, cookies, and candies) may save you money but move you away

from your dietary goals. When buying in bulk, consider also if you have room to store the items in your fridge, freezer, or pantry, and if you can use them before their expiration date.

Remember, eating healthy is not “too expensive.” Do not let food inflation be a reason to forego healthy eating habits. Instead, consider it an opportunity to refresh your shopping hacks and cooking skills. A well-balanced diet is a wise investment in your health that can create value in both your physical and financial well-being.
