SPOTLIGHT ON ...

MAKING HEALTHY LIFESTYLE CHOICES

Lawrence County has a high rate of diabetes, with 8.1% of the county population suffering from the disease. An advisory team, led by the Family and Consumer Sciences Agent, comprised of health/education professionals, hospital, county health department, and board of education implemented a 10-week series, "Taking Control of Your Diabetes." Professionals and educators addressed issues such as monitoring blood glucose/hemoglobin A1-C; physical therapy; physical activity; nutrition; foot care, medications and more. Evaluations after the program ended, revealed that 75% know more about their medications and take better care of their feet. 60% count carbohydrates and monitor blood glucose and hemoglobin A1-C more effectively. As a result of the series, a local diabetes support group has begun monthly meetings.
