

Tailoring: Patch Pocket

Step 1:

Interface top edge of pocket. Cut interfacing strip to fit from top edge, extending $\frac{1}{4}$ inch (65 mm) below foldline of pocket. (Figure 1.)

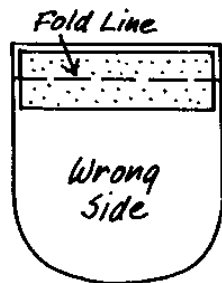

Figure 1.

Step 2:

Cut pocket lining. Redraw cutting line removing $\frac{1}{4}$ inch (65mm) along lower curved edge tapering into sides. (Figure 2.)

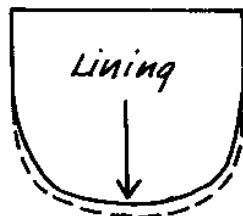

Figure 2.

Step 3:

Place wrong side of lining to right side of pocket. Stitch, leaving a $1\frac{1}{2}$ inch (3.7 cm) opening in center. Backstitch each side of opening. (Figure 3.)

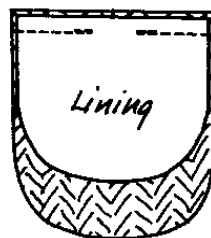

Figure 3.

Step 4:

Grade seam and press. Pull lining down matching edges with lower edge of pocket. Cut a cardboard pattern the size and shape of the finished pocket (minus seam). Tape to pocket. Using the cardboard pattern as a guide, stitch a $\frac{5}{8}$ -inch (1.5 cm) seam using the cardboard pattern as your guide.

Remove cardboard pattern. Grade seam, cutting lining shorter than pocket. Notch along lower curve. (Figure 4.)

Figure 4.

Step 5:

Press. (Figure 5.) Turn pocket through opening.

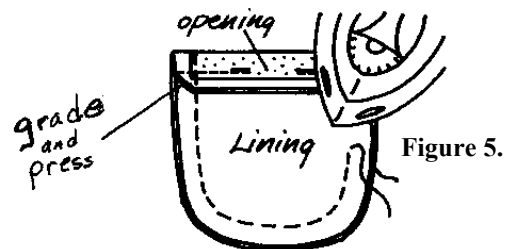

Figure 5.

Step 6:

Close opening using a hand slipstitch.
(Figure 6.)

Figure 6.

Step 7:

Place finished pocket on jacket, matching the placement markings. Baste in place on the right side of the jacket. (Figure 7.)

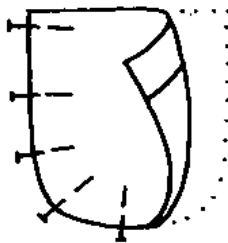

Figure 7.

Step 8:

Try on jacket to check placement. (Figure 8.)

Figure 8.

Step 9:

Hand stitch pocket to jacket using a blind-stitch. Threads should be secure and invisible. Stitch from the right side. (Figure 9.)

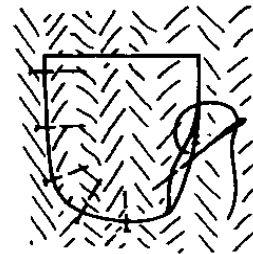

Figure 9.
