

Tailoring: Terms

There are a number of terms used in tailoring that will be helpful to know as you begin your work. They are:

Armhole: the armhole area.

Drawing-In Stitch

Felling: a slanted hemming stitch. The stitch is used to attach the under collar to the garment, the upper lapel facing to the jacket, etc. Note: stitches are smaller than shown here and pulled very snug so they are inconspicuous.

Felling Stitch

Collar roll line: the edge where the upper collar folds.

Collar fall: the portion of the upper collar from the fold (roll line) to the outer edge.

Collar stand: the portion of the upper collar from the fold (roll line) to the neck edge.

Gimp: a heavy thread used to pad a tailored worked buttonhole.

Gimp

Drawing-in thread or stitch: a stitch used for easing, such as on the roll line of a collar, back shoulder to front shoulder, restoring the curve of neckline or lower armhole.

Gorgeline: the seamline that joins the upper collar edge to the front facing.

Notch: area from the end of the gorgeline to the pointed edge of collar.

Mouthline: the finished opening of a pocket.

Spanking: pounding the edges of the fabric when moist to flatten.

Pad Stitch: a hand stitch used to permanently attach interfacing to the fashion fabric. Depending on how close the stitches are to one another, they add body and shape.

Stab Stitch: a hand stitch where the needle goes straight through at the right angles of the fabric. Used to finish edges and for making custom shoulder pads.

Lapel: the uppermost portion of the coat or jacket facing.
