**Kentucky Summer Squash**

**SEASON:** June through October.

**NUTRITION FACTS:** Squash is low in calories. One cup of raw squash contains only 20 calories. It contains vitamins A and C, and is naturally free of fat, cholesterol, and sodium.

**SELECTION:** Popular summer squashes include yellow crookneck, yellow straightneck, zucchini, cocozelle, and pattypan. Pick or purchase summer squash when they are small and tender, and eat both the skin and the seeds. The skin holds many of the nutrients so do not peel. Harvest squash when it is 6 to 8 inches in length. Pattypan squashes are ready when they are 3 to 4 inches in diameter or less.

**STORAGE:** Store unwashed squash in plastic bags in the crisper drawer of the refrigerator. Wash the squash just before preparing. The storage life of summer squash is brief. Plan to use it within two to three days.

**PREPARATION:** Summer squash is a mild-flavored vegetable that combines well with herbs and seasonings. Try it with basil, allspice, rosemary, and marjoram. Cook summer squash as a side dish or use it in stews, casseroles, and main dishes. Summer squash can be grilled, steamed, boiled, sautéed, fried, or used in stir-fry recipes.

**SAVING:** Select small squash with small seeds and a tender rind. Wash and cut into 1/2-inch slices and heat in boiling water for 3 minutes. Cool promptly in cold water and drain. Pack in containers leaving a half inch of headspace. Seal and freeze.
